FOSTERS 2.20

SX-690

- *Fast, silent printing*
- *Kitchen/Bar printing capability*
- *IRC Communication enables floating server operation*

SMART SYSTEMS THAT DO MORE – COST LESS
GELLER ELECTRONIC CASH REGISTER TERMINALS

At the hospitality point of service since 1957

SX-690 can operate as a completely stand-alone hospitality terminal or be linked to back office. Up to eight SX-690s can link to each other in the same system for consolidated management reporting.

Displays
Double-sided 2-line alphanumeric display

In-built Programme
The SX-690's programme is held in reliable, solid-state memory, enabling you or your Dealer to switch on only the options you need to suit your business from the many choices available.

Design your own keyboard
The flat, spill-resistant keyboard has pressure-sensitive raised domes for reliable, one-touch entry.
You or your Dealer can customise the 173 keyboard positions to provide exactly the features and functionality you need.

Printed Coloured Keyboard Overlays
Your Dealer can supply professionally printed and laminated spill-resistant keyboard layouts. If you prefer to change layouts yourself, the *David Software Utility* is obtainable from your dealer.

Low Cost of Ownership
Unlike PC-based EPOS systems, the SX-690 incorporates its programming and data in solid state memory. The benefit of this increased reliability is passed on to the user in lower maintenance costs.

Powerful Reporting
A wide choice of clear, concise Management Reports provides the information you need to control your business. A series of pre-selected Reports can be programmed to print at the touch of a button.

Some of the many programmable choices
- Menu Windows
- Automatic Backup of program and sales information
- Brilliant green, double-sided, 2-line alphanumeric display
- Flat, 173-position, spill-resistant, customisable keyboard
- The heavy-duty, 2-station, 16-digit alphanumeric thermal printer uses 58mm paper and operates silently at a speedy 13 lines per second
- Drop and load receipt and audit rolls for easy paper change
- Graphic logo, Electronic Journal
- Password protected sign-on for servers
- Server Interrupt (several servers can use the SX-690 at the same time)
- Floating Server, Table Transfer, Guest Accounts
- Memory Billing, Compulsory entry of number of covers
- Half pints, Doubles and Modifiers
- Happy Hour with automatic price change by time of day
- Scroll Back/Scroll Forward with Error Correct
- Drawer Alarm with programmable time delay
- Easy price and name change
- Up to 2,000 Price Look Ups (3 PLU shifts) with standard memory
- Up to 99 Servers by ID number, Compulsory server ID
- Compulsory entry of number of covers
- Shift levels for different sizes of the same item (eg small, medium, large)
- Training Mode for new staff
- Remote Kitchen/Bar/Guest Check plus optional Food/Bar Tickets via integral printer
- Dynamic Memory Allocation (The number of price look ups, tables, guests, departments, cashiers and servers are all changeable to meet the need)
- 3 RS232 ports for linking to back office PC and software
- SD Flash Card Port (Sales and programming data, including the electronic journal, can be stored on an SD card. Also useful for upgrading the software and installing the graphic logo)

Hardware Options
- Memory Upgrade to increase Price Look Ups (up to 20,000) and/or number of guests
- Magnetic Server Lock and Keys
- Up to 8 SX-690s can be linked by Inter Register Communication (IRC)
- Up to 2 Kitchen/Bar Printers can be linked to one SX-690
- Up to 4 Kitchen/Bar Printers can be linked to the IRC network
- Cash Drawer can be remotely sited

As standard, SX-690 meets most hospitality requirements, including simple stock control. But linking SX-690 terminals to back office PC, located in-house or remotely, provides an integrated EPOS solution.

Geller Sales and Management Software
David Sales Manager designs and prints your keyboard layouts. It controls all aspects of programming in-house or remotely. It enables you to change prices/product names and build and change menus. *David* collects and consolidates trading information from all SX-690s in the business, in-house or at remote sites, and presents it in easy-to-read Reports for Management.
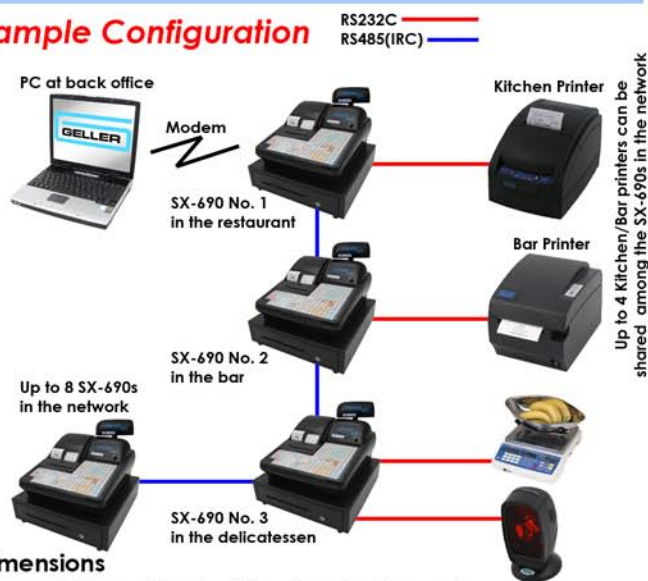

Geller Stock Control Software
Single or multi-site, *SuperStock Hospitality Software* is widely used where full inventory control, menu explosion and purchase ordering are required. More than 25,000 ECR terminals in the UK and Republic of Ireland are polled daily by *SuperStock*.

Powerful management reporting, customised to users' needs, improved margin control and reduced operating costs are just a few of SuperStock's many benefits.

SuperStock demo disks with full specification and user instructions are available from your Geller Dealer.

Sample Configuration

RS232C ———
RS485(IRC) ———

PC at back office
