"With stylish Italian design, this is the best portable small footprint on the market"

PALMAR

The solution in your hands

Freedom for your business

Palmar is an innovative product in the world of cash registers. It is versatile and functional, and can be used as both a portable and a fixed unit. Its ergonomic hand-grip, small size and light weight make it the ideal tool for all who work mobile. Inside large sales areas, for door-to-door vending and in open-air markets. Palmar is the management tool that is always at hand. The specifically designed Docking-Base means Palmar can be completed with Euro Cash Drawer and connected to PC and bar code reader.

Palmar is the ideal solution for forward-looking points of sale. The creative and fresh styling gives this cash register a unique and original flair so that it also adds a touch of novelty to the workplace.

Flexibility

Palmar is fitted with rechargeable internal batteries that supply power for 5 working days. Palmar is not only small and easy to hold, but is also sturdy water-resistant and able to operate at low temperatures. It embodies the flexibility needed by today's and tomorrow's businesses.

Performance

Palmar flexibility and ease of handling do not restrict performance. The accurate engineering of Palmar makes it a professional tool, capable of satisfying the most demanding users.

Two-station thermal printer, graphic store-logos on tickets, complete reports for business management, ability to calculate amounts in four foreign currencies, and PC connection are just a few of the advantages offered by Palmar, a small, but powerful tool.
